ARE YOU READY FOR THIS BUSHFIRE SEASON?

A fire plan is the first step to ensuring you are on the way to being bushfire ready. The second, is to ensure you and your equipment are prepared for the season.

All the evidence from years of experience, indicates the importance of having an engine powered pump for both asset protection as well as post fire management of burning fences, surrounding vegetation and other structures including buildings.

We manufacture our world-famous Firefighter pump ends in Melbourne and fit them to quality petrol engines from Honda and Briggs & Stratton or diesel engines from Yanmar.

If you are already one of the hundreds of thousands of proud Davey Firefighter owners, there are some simple, but important steps you need to take to get your pump ready for the coming season.

Visit davey.com.au to find out how to get fire ready!
